SUNDAY WELL PAID FOR HIS REVIVAL

[Special to The Times-Dispatch.]
New York, April 13.—Twenty-four thousand dollars was the amount subscribed for "Billy" Sunday, the baseball evangelist, in Williamsport, Pa., for his revivalist campaign in that city. This amount was collected in one day.

This information was elicited from Thomas Atherton, a lawyer of Williamsport, who was in the financial committee of the campaign, following a series of questions from a member of the audience, which attended the meeting in the Marble Collegiate Church at Twenty-third Street and Fifth Avenue today. The meeting was for the purpose of "creating" a demand that "Billy" Sunday conduct a campaign in this city.

Both Mr. Atherton and Dr. Mattland Alexander, pastor of the First Presbyterian Church of Pittsburgh, spoke enthusiastically of the ability of Sunday to make converts, and each touched very lightly on the collection phase until they were questioned after their addresses.

"This was the most humiliating part of the campaign," declared Mr. Atherton, "and I felt greatly humiliated when the appeal for the free collection was made. I understand from Mr. Alexander that this method has now been changed."

Following the speeches a number of ministers in the audience made a plea for action in obtaining the services of Sunday to conduct a campaign here. The Rev. Charles Goodell, of St. Paul's M. E. Church, who presided over the meeting, said:

"Many people speak of the humiliating style of Mr. Sunday's preaching, but are we not to be humiliated when we see this town sink into ungodliness while the churches are doing nothing?"

"I am sure," Mr. Atherton said, "that hundreds of men stood outside the tabernacle for hours in the rain waiting to hand in their money through the window."

"How about the drawing-room meetings of the women of the elite in Pittsburgh?"

"I attended two of these," answered Dr. Alexander, "and they were radically different from the tabernacle meetings."

Mr. Atherton was loudly applauded when he said that "Billy" Sunday's religion was the old kind for which the people are hungry to-day.

Had Lung Trouble and Expected to Die

The many recoveries brought about by Edmund's Alternative are attracting wide attention. Read about this:

"I was taken sick in November, 1908. I grew steadily worse. Had two consultations with a doctor, but he said I was incurable. I had tried most of the best treatment and none did me any good, so he asked me to be contented to live, trying a proprietary medicine. I began your Alternative. I was in bed from November 20, 1908, until, I believe, December 20, 1908. I thought I was dying several times. To-day I am healthier and stronger than ever." (Abbey, N.Y.)

(Signed) MRS. H. K. BRILEY.

Edmund's Alternative is most efficacious in bronchitis, catarrh and severe throat and lung affections and upbuilding the system. Contains no harmful or habit-forming drugs. Accepted by authorities. Sold by Trade Drug Company and other leading druggists. Write Edmund Laboratories, Philadelphia, Pa., for booklet of recoveries.

UNIVERSITY PAYS HOMAGE TO FOUNDER

Birthday of Thomas Jefferson Is Commemorated at Charlottesville.

JAMES M. BECK IS ORATOR

Former Assistant Attorney-General Talks of "Scholar in Politics."

[Special to The Times-Dispatch.]
Charlottesville, Va., April 13.—The birthday of Thomas Jefferson, founder of the University of Virginia, was impressively commemorated at the university to-day. The exercises attending this annual celebration, known as Founder's Day, were held in Cabell Hall in the presence of a large audience composed of members of the faculty of the University of Virginia and of other institutions, members of the board of visitors, guests, students, alumni and visitors from many parts of the State.

The academic procession, headed by Dean James Monroe Page, formed at the Rotunda at 10:30 o'clock and proceeded down the law to Cabell Hall, Dean Page, President.

Message from Alderman.
President Edwin A. Alderman's greeting and message, read by Dean Page at the opening of the exercises, evoked great applause. President Alderman wrote as follows:

"Again I am forced to send, rather than to bear, a message of pride and jubilation to all the life of the university assembled to do honor to its great founder and to take counsel as to its present duties and opportunities. I do not need to express again my gratitude to my colleagues among the visitors and faculty, to the students and to my friends generally for their sympathy and forbearance with me in a time of adversity. Nor do I need to speak again my satisfaction with the steady march of wholesome progress visible in all departments of the university's life."

"What I do have in mind to utter is a sort of instinctive prophecy as to the future of the university. Democracy is the supreme need and the ultimate goal of all advancing society. A wiser and juster collective life is the end of all the strivings of democracy. In this splendid evolution of a university, by the steady march of wholesome progress, the task of enlightening, energizing, stimulating, guiding and ennobling this collective life."

"As the child of the consummate Democrat of the modern era, as the chief intellectual accomplishment of the most distinguished of American Commonwealths, this high task of guidance and ennoblement to a new and juster social spirit is to be borne and more the duty of the University of Virginia."

"I pray and believe that with increasing zeal the University of Virginia will strive to possess itself of all the powers and influence of service to the progressive life of its time in State and nation. It will, and it ought to, hold fast to the eternal values of its serene and honorable past but it will, and it ought to, sweep the future with understanding, seeking opportunity to light and warm with its knowledge and protection the masses of men and women struggling in the shadows for the finer and juster issues of life."

"God put strength into the arms of steadfastness, the power and patience into the hearts of those who love the university, and who are striving to fulfill its destiny."

Wins Fight for Health.
Dean Page prefaced his reading of the president's letter by saying that President Alderman had written for good health, and would be back in his position in the fall.

The orator of the day was James M. Beck of the New York bar, formerly United States Attorney-General, and a distinguished scholar and statesman. He addressed the university in politics.

Before introducing him, Dean Page discussed the distinctive characteristics of the present session—the eighty-ninth consecutive session of the university. He said that 918 students had already enrolled, an increase of seventy-eight over last year.

Another characteristic of this session, Dean Page said, was the admirable spirit with which the students are carrying out the principles of student self-government.

"It is presently my lot," he said, "to attend meetings of the Association of Deans of State Universities and other similar organizations. When questions of student discipline come up for discussion, I greatly enjoy looking calmly on while some of our universities become almost frantic in recounting their exasperation at students hazing others, cheating on examinations, etc. These deans are beginning to find out that such problems do not exist for the dean of this university, and the burden of my correspondence has been seriously increased by the number of letters I get asking, 'How do the students at Virginia handle this problem or that one?'"

Other Deans Study System.
"You will be interested to hear that one dean of a great university more than 1,000 miles from here visited us this winter for the purpose of studying the spirit and life of this institution. Since returning home he has entered into a mild conspiracy with various other deans to try to induce the dean of this university to make an extended tour of those institutions and speak on the subject of Virginia student spirit—to be, as he expressed it, the apostle to them of the honor system and Virginia student self-government."

"I feel that I owe it to you, young gentlemen, to say as publicly as possible, that my experience of the last three sessions has deepened my already profound appreciation for the spirit of the University of Virginia."

Dean Page concluded his speech with a brief discussion of numerous improvements made and under way to the university grounds and buildings, the increased State appropriations, and the establishment of the office of State Forester, which will be closely related to the university in a scientific way. He wound up with a review of alumni activities, especially the plan of foot to make reunions at finals in June of great interest, size and value.

He then read out a number of messages conveying good wishes to alma mater on Founder's Day from alumni and alumni chapters all over the country, from as far West as the Pacific Coast, and from Canada to the Gulf.

Address of Mr. Beck.
Mr. Beck said in part:

"No contemporary record suggests that Jefferson's personality compelled admiration and adherence as did Washington and Hamilton. Nor did he have the same quality as the latter, and John Marshall. He was no orator like Henry or Adams. A shy, diffident man, he hated the 'moral rage' of debate rarely spoke, and when he did his voice quickly became husky and inarticulate. Although the storm center of the political controversies in the beginning of the republic, he was neither a natural nor willing fighter. He loved his garden more than the councils of the mighty, and shrank with the diffidence of a woman from personal controversy, and yet, paradoxical as it may seem, he was the most aggressive and militant leader of a political party that our history has known. He was a cunning intriguer as was Aaron Burr. He was by temperament and choice a philosopher, and was most happy when 'far from the meddling crowd.'"

"How did it, then, come to pass that this student by nature and inclination should have been the master spirit in the bitter controversies of a most tumultuous period, leading in the New World a young nation along the unbroken paths of a new existence, and guiding and influencing in the Old World the mighty uprising of the French people?"

Idea of Failure Present.
"We are apt to associate with the scholar in politics the idea of failure, especially in democratic Commonwealths where there is no hereditary right to place and where preferment necessarily depends upon an uneducated and often capricious public opinion, which ordinarily prefers a simple and aggressive type of man to the more complex student of books. The literary faculty has not always, perhaps not generally, been associated with the genius for practical administration. It is a common belief that the world owes more of its constructive statesmanship to the so-called 'uneducated' man, like Columbus, Cromwell, Oliver, Washington, Jackson and Lincoln, than to its learned scholars, such as Bacon, Milton, Burke, Lafayette, Macaulay and Victor Hugo."

"This is the fallacy of too hasty generalization, for it would be easy to parallel this list with another, consisting of illustrious men who have failed in public life, and quoted men like Disraeli and Gladstone, who have been signally successful. The most masterful statesmen of contemporary politics, Theodore Roosevelt, a Harvard graduate, while Virginia's last contribution to the chief magistracy, President Wilson, aptly illustrates that a philosopher, fresh from the classroom can guide the fiery steeds of Democracy in the political arena."

In conclusion, Mr. Beck said:

"In his last days Lafayette, then nearly threescore and ten, visited Jefferson at Monticello. A great banquet was given in Lafayette's honor in the great room of this university, and it was attended by President James Monroe and two ex-presidents, Madison and Jefferson. When Jefferson was toasted he replied in a speech in which, linking

together the cause of education and the cause of liberty, he said:

"And could I live to see the University of Virginia once enjoy the patronage and enrichment of our public authorities with undivided views, I should die without a doubt of the future fortune of my native State and in the consoling contemplation of the happy influence of this institution on its character, its virtue, its prosperity and its safety."

Arrested for Cutting Man.
Lilly Wood, colored, was arrested last night by Police Sergeant Zimmer and Patrolman Duffy on the charge of stabbing Stuart Wood in the arm with a knife. The man was treated by Dr. M. L. Boyle, Jr., City Hospital ambulance surgeon.

Boy Fractures Skull.
Silas Hull, a seven-year-old colored boy, sustained a fractured skull yesterday when he fell from his wheel at Harrison and Grace Street. He was treated by Dr. M. L. Boyle, Jr., ambulance surgeon, and removed to the City Hospital. He was later taken to his home by his parents.

April 2 1914.
"Good-by, everybody. I am taking my life. My brain is so sick and tired. I am a physical wreck and without funds, and no place to stay. I have tried all my life to get along, but have failed at everything."

"On the night of May 15, 1903, I married the prettiest and sweetest girl in the world—Mrs. George Hase. She had an awfully sweet, good little boy, and oh! how she loved him. He is still living, and has a good job in Richmond. My poor wife died of consumption on February 16, 1914. I told her I would join her in a short while, and I am as good as my word when I can be. I left Richmond two days before the poor girl died. I had been there five months out of a job, and had to beg on the streets to get something to eat. The last two nights I was in Richmond I slept in the depot, and that made me sick, so I hopped to Charlottesville and remained a couple of days with friends, who gave me the fare to Lynchburg. While on the train I was stricken with pneumonia, so I was sent to the hospital, where I stayed nine weeks. I left there yesterday and came to Charlottesville. I told a lie to get a quarter from Charlie Wood. I wanted to buy poison."

"I was born at West Point, Ga., July 16, 1875 and I have been in the clutches of all fortune as long as I remember."

Guest of Van Buren
Colonel Berkeley, of Haymarket, writes Governor of Seeing Lafayette. Governor Stuart received a letter yesterday from Colonel Edmund Berkeley, of Haymarket, Indorsing George C. Round for a position on the new State normal school board, which is to be named by the Governor shortly for the management of the four normal schools of the State. For purposes of identification the Colonel Berkeley mentioned in his letter that he had been a guest at the White House at a formal dinner given by President Martin Van Buren, just seventy-six years ago. If Mr. Stuart did not recall that dinner, Colonel Berkeley added that he had the honor to have been held in the arms of the Marquis de Lafayette on the occasion of his second visit to America, eighty-nine years ago. Colonel Berkeley is probably the only man now living in Virginia who ever saw the great French general, who so ably aided General Washington in the war of the Revolution.

Brain Sick and Tired; Wreck, All Hope Gone
M. A. Turner, Suicide, Leaves Letter Revealing Tortures of His Soul.

Charlottesville, Va., April 13.—M. A. Turner, aged forty years, a transient employed at various times at local tailoring establishments, came to Charlottesville ten days ago from Lynchburg, and in a fit of despondency took a dose of poison and died on Saturday night, April 4, at the University Hospital, where he was rushed for treatment. As no relatives claimed his body, he was interred on the following Tuesday afternoon in the Tailors' Union section in Oak Hill Cemetery.

A local undertaking establishment yesterday, the janitor came across the following letter, had fallen from the dead man's clothes:

"April 2 1914.
"Good-by, everybody. I am taking my life. My brain is so sick and tired. I am a physical wreck and without funds, and no place to stay. I have tried all my life to get along, but have failed at everything."

"On the night of May 15, 1903, I married the prettiest and sweetest girl in the world—Mrs. George Hase. She had an awfully sweet, good little boy, and oh! how she loved him. He is still living, and has a good job in Richmond. My poor wife died of consumption on February 16, 1914. I told her I would join her in a short while, and I am as good as my word when I can be. I left Richmond two days before the poor girl died. I had been there five months out of a job, and had to beg on the streets to get something to eat. The last two nights I was in Richmond I slept in the depot, and that made me sick, so I hopped to Charlottesville and remained a couple of days with friends, who gave me the fare to Lynchburg. While on the train I was stricken with pneumonia, so I was sent to the hospital, where I stayed nine weeks. I left there yesterday and came to Charlottesville. I told a lie to get a quarter from Charlie Wood. I wanted to buy poison."

"I was born at West Point, Ga., July 16, 1875 and I have been in the clutches of all fortune as long as I remember."
